

Intelligent interface makes monitoring simple

Monitors:

- NIBP – Includes cuff & hose
- ECG – Includes Lead Cable
- SpO₂ – Nellcor OxiMax with Reusable finger sensor
- CO₂ - Sidestream
- IBP- 2 Channels – No cables provided
- Temp – 1 Channel – No probe provided

Easy to Use

With Sidestream CO₂

- Dedicated function keys provide one-touch access to all vital functions
- Colorful waveforms with automatic display configuration simplify use and enhance display visibility
- Standard features include six waveforms, auto-adjustable large numerics, 3 or 5-lead ECG, lead-selectable respiration, non-invasive blood pressure, temperature, and Masimo SET® motion tolerant SpO₂
- Optional features include arrhythmia analysis, 3-lead ST analysis with trends and alarms, Microstream® CO₂, Nellcor® OxiMax® SpO₂, two invasive blood pressures, and a dual trace recorder
- View 12™ ECG analysis module offers diagnostic quality 12-lead ECG interpretation with ST and arrhythmia analysis in a compact, easy-to-use module
- Gas Module SE offers complete 5-agent auto-ID, CO₂, O₂ and N₂O analysis for comprehensive and reliable gas monitoring
- Built-in PCMCIA ports allow you to upgrade software, enhance memory, and transfer data with minimal effort
- Integrated power supply with lithium-ion battery technology provides uninterrupted patient care during transport
