

# Durable, Flexible, & Easy to Use Patient Monitor in a compact design

## Features include:

- 12.1" color TFT display with 8 waveforms
- Large font display
- SpO<sub>2</sub> pulse-tone modulation (Pitch Tone)
- Clinical Proved SpO<sub>2</sub> Technology
- Fixed compact flash for memory card or wireless LAN card
- Li-ion / lead acid battery
- Networkable with Hypervisor VI Central Monitoring System
- Mindray PM-9000 Express Main Unit (12.1" TFT Display)
- Including: ECG, 2-IBP, RESP, 2-TEMP, NIBP, Mindray SpO<sub>2</sub>, Recorder Li-Ion Battery

The PM-9000 Express is a robust patient monitor, small enough to move around, yet flexible enough to adapt to your particular needs. With a variety of optional extras, including arrhythmia and ST analysis, EtCO<sub>2</sub> measurement and multi-gas analysis, PM-9000 Express is configurable to suit your requirements. Purchase only the advanced features that you need and nothing more.

With NIBP recall, extensive data storage capability and well-established Microstream EtCO<sub>2</sub> technology, PM-9000 Express is particularly well-suited for use in peri-anesthesia and critical care environments. Further, the quick-action keys on the front panel make this device especially easy to use, assuring a shorter learning curve for new staff. Rich in functions, conveniently adaptable and pleasingly affordable, PM-9000 Express may be just the monitor for your department.
